

SUMMARY

Senior UI/UX Designer, **10+ years** designing intuitive web and mobile experiences across healthcare, EV charging, logistics, fintech, and e-commerce. I run the full UI/UX process, user research, wireframes, interaction and visual design, prototyping, design systems, usability testing, and developer handoff, and lead a team of four. Recent impact: unified six healthcare services into one **297-screen** app on a shared design system, raised task completion from **61% to 94%** on a clinical product, and won a **~\$100K** engagement from a single prototype.

EXPERIENCE

Senior UI/UX Designer

Apexon | Jun 2022–Present

Lead UI/UX design across concurrent client engagements; manage a team of 4, own client conversations and presales, sit on the hiring panel, and run design critique.

- Unified six healthcare services (consultations, pharmacy, packages, chronic care, homecare, records) into one native app, one account, one checkout, one design system; **297 screens**, 18 core + 161 components, leading a team of 4 (myAster, Aster UAE).
- Raised task completion from **61% to 94%** and removed **40+ min/day** of data reconciliation from clinicians' morning rounds by redesigning a kidney-care clinical portal; zero critical failures in final usability testing (KidneyLink, U.S. Renal Care).
- Won a **~\$100K** client engagement from a single zero-to-one prototype by framing an unbriefed problem and validating the flows before production existed (Apex Insights Portal, long-term-care analytics, 126 screens).
- Took a supplier portal's most-failed task from **0% to 100%** and freed **6-10 hrs/week** of account-manager time by rebuilding the information architecture around the order, not the document (Flint-Link, Flint Group, 2024).
- Lifted onboarding completion from **60% to 89%** and cut reading-log time from 3-5 min to under 30s by redesigning the flows of a pet-diabetes app (iOS and Android) around one early win (PetTrackr, Universal Biosensors).
- Reduced client onboarding errors **60%** and tripled tenant-configuration speed (**4.6/5** operator satisfaction) by designing a pharmacy-benefits (PBM) admin platform from scratch (RxAgile).

Senior UI/UX Designer

TNM Media | Sep 2018–May 2022

- Lifted engagement **35%** within 3 months by leading the end-to-end redesign of a global reinsurance platform (research, information architecture, high-fidelity UI).
- Cut design iteration time **25%** by building and rolling out a unified design system across **4 global offices** (tokens, component libraries, scalable patterns).
- Lifted conversion **20%** by redesigning e-commerce task flows and checkout.
- Improved content discoverability for Lamborghini, Adidas, and Genesis through research-driven newsroom and brand-content design.

UI/UX Designer

Infostretch (now Apexon) | Jun 2016–Jun 2018

- Cut bounce rate **14%** and improved task completion **15%** on an enterprise SaaS product through journey mapping and A/B testing.
- Cut time-to-adoption **30%** on a major SaaS programme by presenting design rationale that shaped roadmap decisions.

UI/UX & Graphics Designer

Azilen Technologies | Aug 2014–May 2016

- Drove a **30%** engagement increase through a full-scale, cross-functional website redesign.
- Cut app uninstalls **15%** in 6 months by simplifying the Spoonzo order flow and load times.

SKILLS

UX Design & Research user research | usability testing | user flows & journey mapping | information architecture | user-centered design | design thinking

UI & Interaction Design interaction design | visual design | wireframing | high-fidelity UI | micro-interactions | responsive design (web, iOS & Android)

Prototyping & Design Systems interactive prototyping | design systems | component libraries | design tokens | accessibility (WCAG) | developer handoff

Leadership team leadership | mentoring | hiring & interview panels | stakeholder management | client presales | cross-functional collaboration | Agile

AI & Emerging designing for AI trust | AI-assisted design workflows | rapid prototyping in code

Tools Figma | Figma Make | Adobe Suite | Miro | Maze | Claude | Claude Code | ChatGPT | Replit | Base44 | Lovable | v0 | HTML/CSS

LEADERSHIP & COMMUNITY

- ADPList Top 1% Mentor, 150+ designers coached on portfolio, design thinking, and interviews.
- Founder, @the.deep.ux, a UX community grown to 20,000+ members.

EDUCATION

B.E, Electronics & Communications

VVP Engineering College

Diploma, Electronics & Communications

Christ Polytechnic Institute
